

Maly IT Solutions

Case Study – Insight Regulatory

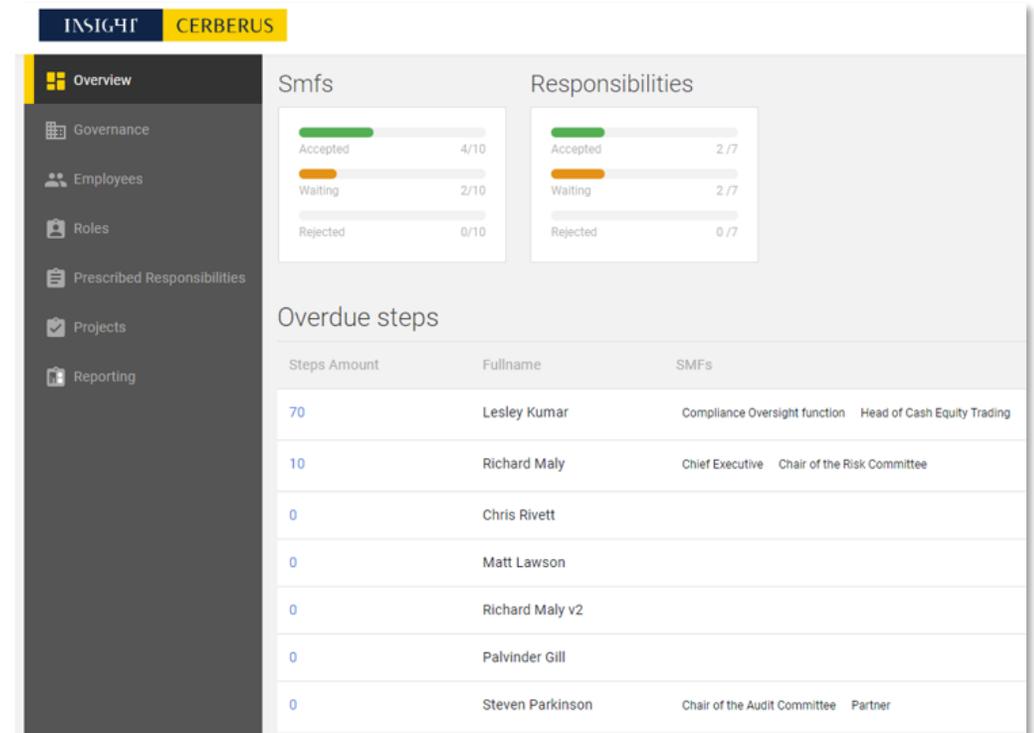

Case Study: Insight Regulatory

About Insight Regulatory: Set up in 2018 to provide small and medium companies in the financial services and banking sector with practical, pragmatic and effective compliance, risk and regulatory advice. They focus on helping clients put in place the right governance, processes and reporting to ensure they remain compliant at all times with stringent UK and global regulations.

About Cerberus: To support their work Insights had created their own MVP platform called Cerberus, designed to help financial institutions remain fully compliant with the Senior Managers and Certification Regime (SMCR) rules. The platform provides real time compliance activity monitoring and reporting, simplified control of staff certification as well as mapping and tracking of governance roles and responsibilities.

The Challenge: Insight needed a local partner who could deploy, operate, support and further develop Cerberus. This would need to be done in a highly secure way given the sensitive nature of the data as well as being robust and scalable to support many users across multiple clients.

“Maly are a great team to work with, they know what they are doing and we trust them with the development and maintenance of our software tool.”

Lesley Kumar & Palvinder Gill, Partners & Co-Founders,
Insight Regulatory

Case Study: Insight Regulatory

The Solution:, Maly quickly understood the Cerberus design and architected a solution to host is securely on AWS. Having deployed it they then put in place the operational and support services required to make it robust and reliable solution. Maly also created a “sandpit” test version used to develop and test new features such as additional audit reporting, improved email certification and improved notifications of overdue compliance steps.

The Result: Insight now had a robust, reliable and scalable version of their Cerberus platform to use with their financial services customers as well as an expert technical team in place to be able to support any demonstrations or implementations that they secured as a result of their business development activities.

Benefits Summary

- ✓ Scalable & robust deployed solution
- ✓ Secure and reliable backup
- ✓ Ongoing development support
- ✓ Product roadmap for multitenancy

“We're very happy with what Maly have done for us and have a great working relationship. Maly work at our pace and have the technical know-how that we needed to upgrade our software product. They have great experience and are very responsive to our needs and have taken the time to understand our product and improve it. We have access to all the experience in the team and are great to deal with on a personal level. We trust Maly to do what we need and provide advice on the best way forward.”
